No consideration to trade should be made without thoroughly understanding and reviewing the risks involved in such trading. If you are unsure, you must seek professional advice on the same.

In considering whether to trade or authorize someone to trade for you, you should be aware of or must get acquainted with the following:-

1. BASIC RISKS:

1.1 Risk of Higher Volatility:

Volatility refers to the dynamic changes in price that a security/derivatives contract undergoes when trading activity continues on the Stock Exchanges. Generally, higher the volatility of a security/derivatives contract, greater is its price swings. There may be normally greater volatility in thinly traded securities / derivatives contracts than in active securities / derivatives contracts. As a result of volatility, your order may only be partially executed or not executed at all, or the price at which your order got executed may be substantially different from the last traded price or change substantially thereafter, resulting in notional or real losses.

1.2 Risk of Lower Liquidity:

Liquidity refers to the ability of market participants to buy and/or sell securities / derivatives contracts expeditiously at a competitive price and with minimal price difference. Generally, it is assumed that more the numbers of orders available in a market, greater is the liquidity. Liquidity is important because with greater liquidity, it is easier for investors to buy and/or sell securities / derivatives contracts swiftly and with minimal price difference, and as a result, investors are more likely to pay or receive a competitive price for securities / derivatives contracts purchased or sold. There may be a risk of lower liquidity in some securities / derivatives contracts as compared to active securities / derivatives contracts. As a result, your order may only be partially executed, or may be executed with relatively greater price difference or may not be executed at all.

1.2.1 Buying or selling securities / derivatives contracts as part of a day trading strategy may also result into losses, because in such a situation, securities / derivatives contracts may have to be sold / purchased at low / high prices, compared to the expected price levels, so as not to have any open position or obligation to deliver or receive a security / derivatives contract.

1.3 Risk of Wider Spreads:

Spread refers to the difference in best buy price and best sell price. It represents the differential between the price of buying a security / derivatives contract and immediately selling it or vice versa. Lower liquidity and higher volatility may result in wider than normal spreads for less liquid or illiquid securities / derivatives contracts. This in turn will hamper better price formation.

1.4 Risk-reducing orders:

The placing of orders (e.g., "stop loss" orders, or "limit" orders) which are intended to limit losses to certain amounts may not be effective many a time because rapid movement in market conditions may make it impossible to execute such orders.

1.4.1 A "market" order will be executed promptly, subject to availability of orders on opposite side, without regard to price and that, while the customer may receive a prompt execution of a "market" order, the execution may be at available prices of outstanding orders, which satisfy the order quantity, on price time priority. It may be understood that these prices may be significantly different from the last traded price or the best price in that security / derivatives contract.

1.4.2 A "limit" order will be executed only at the "limit" price specified for the order or a better price. However, while the customer receives price protection, there is a possibility that the order may not be executed at all.

1.4.3 A stop loss order is generally placed "away" from the current price of a stock / derivatives contract, and such order gets activated if and when the security / derivatives contract reaches, or trades through, the stop price. Sell stop orders are entered ordinarily below the current price, and buy stop orders are entered ordinarily above the current price. When the security / derivatives contract reaches the pre-determined price, or trades through such price, the stop loss order converts to a market/limit order and is executed at the limit or better. There is no assurance therefore that the limit order will be executable since a security / derivatives contract might penetrate the pre-determined price, in which case, the risk of such order not getting executed arises, just as with a regular limit order.

1.5 Risk of News Announcements:

News announcements that may impact the price of stock / derivatives contract may occur during trading, and when combined with lower liquidity and higher volatility, may suddenly cause an unexpected positive or negative movement in the price of the security / contract.

1.6 Risk of Rumors:

Rumors about companies / currencies at times float in the market through word of mouth, newspapers, websites or news agencies, etc. The investors should be wary of and should desist from acting on rumors.

1.7 System Risk:

High volume trading will frequently occur at the market opening and before market close. Such high volumes may also occur at any point in the day. These may cause delays in order execution or confirmation.

1.7.1 During periods of volatility, on account of market participants continuously modifying their order quantity or prices or placing fresh orders, there may be delays in order execution and its confirmations.

1.7.2 Under certain market conditions, it may be difficult or impossible to liquidate a position in the market at a reasonable price or at all, when there are no outstanding orders either on the buy side or the sell side, or if trading is halted in a security / derivatives contract due to any action on account of unusual trading activity or security / derivatives contract hitting circuit filters or for any other reason.

1.8 System/Network Congestion:

Trading on exchanges is in electronic mode, based on satellite/leased line based communications, combination of technologies and computer systems to place and route orders. Thus, there exists a possibility of communication failure or system problems or slow or delayed response from system or trading halt, or any such other problem/glitch whereby not being able to establish access to the trading system/network, which may be beyond control and may result in delay in processing or not processing buy or sell orders either in part or in full. You are cautioned to note that although these problems may be temporary in nature, but when you have outstanding open positions or unexecuted orders, these represent a risk because of your obligations to settle all executed transactions.

2. As far as Derivatives segments are concerned, please note and get yourself acquainted with the following additional features:-

2.1 Effect of "Leverage" or "Gearing":

In the derivatives market, the amount of margin is small relative to the value of the derivatives contract so the transactions are 'leveraged' or 'geared'. Derivatives trading, which is conducted with a relatively small amount of margin, provides the possibility of great profit or loss in comparison with the margin amount. But transactions in derivatives carry a high degree of risk.

You should therefore completely understand the following statements before actually trading in derivatives and also trade with caution while taking into account one's circumstances, financial resources, etc. If the prices move against you, you may lose a part of or whole margin amount in a relatively short period of time. Moreover, the loss may exceed the original margin amount.

A. Futures trading involve daily settlement of all positions. Every day the open positions are marked to market based on the closing level of the index / derivatives contract. If the contract has moved against you, you will be required to deposit the amount of loss (notional) resulting from such movement. This amount will have to be paid within a stipulated time frame, generally before commencement of trading on next day.

B. If you fail to deposit the additional amount by the deadline or if an outstanding debt occurs in your account, the stock broker may liquidate a part of or the whole position or substitute securities. In this case, you will be liable for any losses incurred due to such close-outs.

C. Under certain market conditions, an investor may find it difficult or impossible to execute transactions. For example, this situation can occur due to factors such as illiquidity i.e. when there are insufficient bids or offers or suspension of trading due to price limit or circuit breakers etc.

D. In order to maintain market stability, the following steps may be adopted: changes in the margin rate, increases in the cash margin rate or others. These new measures may also be applied to the existing open interests. In such conditions, you will be required to put up additional margins or reduce your positions.

E. You must ask your broker to provide the full details of derivatives contracts you plan to trade i.e. the contract specifications and the associated obligations.

2.2 Currency specific risks:

1. The profit or loss in transactions in foreign currency-denominated contracts, whether they are traded in your own or another jurisdiction, will be affected by fluctuations in currency rates where there is a need to convert from the currency denomination of the contract to another currency.
2. Under certain market conditions, you may find it difficult or impossible to liquidate a position. This can occur, for example when a currency is deregulated or fixed trading bands are widened.
3. Currency prices are highly volatile. Price movements for currencies are influenced by, among other things: changing supply-demand relationships; trade, fiscal, monetary, exchange control programs and policies of governments; foreign political and economic events and policies; changes in national and international interest rates and inflation; currency devaluation; and sentiment of the market place. None of these factors can be controlled by any individual advisor and no assurance can be given that an advisor's advice will result in profitable trades for a participating customer or that a customer will not incur losses from such events.

2.3 Risk of Option holders:

1. An option holder runs the risk of losing the entire amount paid for the option in a relatively short period of time. This risk reflects the nature of an option as a wasting asset which becomes worthless when it expires. An option holder who neither sells his option in the secondary market nor exercises it prior to its expiration will necessarily lose his entire investment in the option. If the price of the underlying does not change in the anticipated direction before the option expires, to an extent sufficient to cover the cost of the option, the investor may lose all or a significant part of his investment in the option.
2. The Exchanges may impose exercise restrictions and have absolute authority to restrict the exercise of options at certain times in specified circumstances.

2.4 Risks of Option Writers:

1. If the price movement of the underlying is not in the anticipated direction, the option writer runs the risks of losing substantial amount.
2. The risk of being an option writer may be reduced by the purchase of other options on the same underlying interest and thereby assuming a spread position or by acquiring other types of hedging positions in the options markets or other markets. However, even where the writer has assumed a spread or other hedging position, the risks may still be significant. A spread position is not necessarily less risky than a simple 'long' or 'short' position.
3. Transactions that involve buying and writing multiple options in combination, or buying or writing options in combination with buying or selling short the underlying interests, present additional risks to investors. Combination transactions, such as option spreads, are more complex than buying or writing a single option. And it should be further noted that, as in any area of investing, a complexity not well understood is, in itself, a risk factor. While this is not to suggest that combination strategies should not be considered, it is advisable, as is the case with all investments in options, to consult with someone who is experienced and knowledgeable with respect to the risks and potential rewards of combination transactions under various market circumstances.

3. TRADING THROUGH WIRELESS TECHNOLOGY/ SMART ORDER ROUTING OR ANY OTHER TECHNOLOGY:

Any additional provisions defining the features, risks, responsibilities, obligations and liabilities associated with securities trading through wireless technology/ smart order routing or any other technology should be brought to the notice of the client by the stock broker.

Penny Stocks

Clients may note that all the stocks and securities listed on the Stock Exchange are not actively traded. In other words, there are no readily available sellers or buyers in some securities and/or there are not sufficient trades or volumes from which the market price may be arrived at with some reliability. Such stocks are called 'illiquid securities' or 'Penny stocks'. They are comparatively more vulnerable to market manipulation and / price rigging. The spread, i.e., the difference between the offer price and bid price is usually wide and their purchase or sale at a given time may be difficult and in any case uncertain. Exchanges bring out monthly list of such securities based on the volume during the last calendar month.

We do not encourage trading in penny stocks. We may impose higher margin percentage and/or fix small exposure limits in respect of Penny Stocks and not permit the client to concentrate in such stocks. We may impose further restrictions as to Penny Stocks through the RMS policy. Client's instructions for trading in illiquid securities may be rejected without assigning any reason.

Setting up Client's Exposure Limit

We may impose and vary limits (including exposure limits, turnover limits, margin limits, securities wise limits in respect of which orders can be placed etc.) on the orders that the client can place through us. We may vary or reduce the limits or impose new limits on the basis of the risk perception and other factors considered relevant by us and not limited to the limits as per the Exchange / SEBI directions. We may subject any order placed by the client to review before its entry into the trading system and may refuse to execute/allow execution of any order due to but not limited to the reason of lack of Margin/securities or the order exceeding limits set by our surveillance/Exchange/SEBI and any other reason which may be deemed appropriate in the circumstances. The losses, if any, on account of such refusal or due to delay caused by such refusal or due to delay caused by such review shall be borne exclusively by the client.

We have margin based RMS System in which, total deposit (excluding over-concentration value of the securities) of the client is uploaded in the trading system and the client may take exposure on the basis of applicable margin for the intended security as per the VAR based margining system of the Stock Exchange and margin defined by the company on their scrip wise Risk perception. Client may take the benefit of "credit for sale" i.e., benefit of shares held in margin by selling the same by selecting delivery option through order entry window in the trading system, whereby the value of the shares sold will be added with the value of deposit and on the basis of aggregate, client may take exposure. In case of exposure taken on the basis of shares margin, the payment is required to be made before the pay-in date otherwise it will be liable to square off any time due to shortage of margin. Further, in the derivative segments, if some special margin is imposed by exchange, the same must be met on the same day before closing of trading otherwise position of the client will be liable to square off due to shortage of margin.

In the sole discretion of the Company, a client may be allowed to trade beyond exposure limit or the limit may be increased. A client having availed such indulgence shall not be heard to complain about his trades only on this account and shall meet the margin shortfall at the earliest without waiting for reminder. The golden rule is Limit your exposure so as to limit your risk to your means.

Brokerage Rate

We do not charge any brokerage in excess of the rate(s) provided by the SEBI / Exchange. The agreed rates of brokerage are part of this book-let and the clients are advised to fully satisfy themselves about the same before signing. The brokerage is charges on both Buy & Sell, except otherwise indicated in the schedule of brokerage. Brokerage rates may be changed from time to time but shall not be increased without prior 15 (fifteen) days' notice. Only Head Office and concerned Zonal Head is competent to reduce the rates of brokerage and no employee or officer at Branches is authorized to do so. Any reduction in rate should not be taken as effective unless reflected in the contract notes.

Delay Payment Charges and Penalties

Clients are required and expected to meet their fund obligations immediately, when due, as per SEBI / Exchange requirements and not make us use our funds to meet their fund obligation. For the clients who do not pay on time your broker has to pay or the client has to suffer penalties by the Exchange. So as to be compensated in such an eventuality, we may levy Delay Payment Charges on the amounts, not exceeding the debit balance in the ledger, for the period of delay at a rate upto 24% per annum calculated on daily basis for the period of delay.

We do not pay interest on the clients' funds received towards margin. In exceptional cases, considering the amount of margin, its utilization and the client's past history, we may agree to deduct out of Delay Payment Charges, interest on any part of the unutilized margin at such rate as determined from time to time but not exceeding the rate of Delay Payment Charges.

We may impose reasonable penalties for bouncing of cheques, bad deliveries, non-delivery, auction on failure of payment, nonpayment of margin money, excess margin or any trades, actions or omissions contrary to the Rules, Regulations and Byelaws of the SEBI or Exchange, to discourage such violations and recover the same from the Client's Account directly.

Where the Company has to pay or suffer any penalty from any authority as a consequence of / in relation to / in connection with any orders/ instructions/ trades/ deals or actions of a client, the same shall be borne by the client.

Right of Sale of client's securities or closing the client's open position without giving notice

We do not believe in selling clients' securities or closing out their positions without sufficient notice to them. On the other hand, we expect our esteemed clients to be regular and punctual in meeting their fund obligations. The requirement of margin and the value of any security given/treated as Margin varies and multiplies with market volatility.

Higher is the margin deficit, shorter would be the time to make it up. However, in case the available margin falls below the given percentage, informed in advance, we reserve the right to sell a client's securities or to close out his all or some open positions without notice to prevent escalation of risk. The client may, however, have no grievance if SMC does not take such action and waits for the client's margin/response.

We would have the discretion to square off the position of Client/s in following circumstances:

- (a) In case of Margin Trades, if the open position is neither squared off nor converted to Delivery by Client/s within the stipulated time or where Mark to Market Loss on the open position has reached the stipulated percentage of the margins placed with us.
- (b) In all other cases where the margin or security placed by the Client falls short of the requirement or where the limits given to the Client have been breached or where the Client has defaulted on his existing obligation within the stipulated time.

All the losses based on actual executed prices, brokerage, charges and penalties levied by the Exchange relating to the Square off shall be borne by the client.

Shortages in obligations (arising out of internal netting of trades or otherwise)

Where a client fails to meet his securities pay-in obligations as due for any settlement and auction is not made by the Exchange because of reasons like internal netting of trades, then either auction takes place in the exchange or if the delivery is client to client, then the client's account is debited for such short delivery at "valuation price or the average of auction rate", whichever is higher. The buyer client shall be credited with the same amount as debited to seller client. In case, no auction price is available in a particular instance, the above mentioned debit/credit shall take place at closing price on the auction day plus 10% and trading day to auction day high price, whichever is higher. If the buyer-client requires delivery of the said shares, he is advised to buy the same next day from the market on his own.

Where a client buys securities in one settlement, and sells the same in a subsequent settlement, without having received the payout of the securities, any resulting auction / losses will be the sole responsibility of the client.

Conditions under which a client may not be allowed to take further position or his existing position may be closed

Subject to a client's KYC verification and his meeting initial margin and other margin requirements, a client may take positions. However, he may not be allowed to take further position and/or the open positions may be squared off by us under any of the following circumstances:

- a. SEBI or Exchange imposing restrictions on further exposures in cases of extreme volatility in the market or in a security or group of securities or the client's margin falling short due to volatility or otherwise.
- b. client or the Broker exceeding or touching exposure limits set by the Exchange in the particular scrip.
- c. reasonable doubt as to bonafide of the transaction or identity of the client in the light of the financial status and objectives as disclosed in the KYC form.
- d. reasonable doubt as to the transaction being cross trade, circular trade, fraudulent practice or connected with price manipulation or market rigging.
- e. SEBI or other competent authority issuing a debarment order against the client from buying, selling or dealing in securities, unless the order is vacated.

Temporary Suspension or Closing of Account at Client's Request

The client may, at times, like to suspend his account for some time due to reasons like – illness, holidaying or pilgrimage. SMC account manager may note the instruction to suspend the transactions in an account on receipt of a written request by the client. However, the client will be responsible for all his positions till that time and shall make arrangements for due discharge of his obligations in respect of such transactions.

A suspended account may be made active by another instruction in writing by the client.

The client, subject to his meeting all obligations regarding pending positions, may seek closure of his account by a letter in writing duly signed by him. Such request shall be effective from the time it has been noted in SMC's computer system and the client shall be liable to meet all his obligations.

The request for suspension, re-activation or closure of account should be made by the client and not by his Power of Attorney Holder (POA). The Company may also withhold any payouts of client or suspend his trading account due to any surveillance action or judicial/regulatory direction or in the circumstances it would be reasonable to do so.

De-registering a Client

SMC may de-register a client in any of the following events:

- a. Death of a client who is a natural person;
- b. Liquidation or winding up of a client who is a corporate;
- c. Insolvency or bankruptcy of the client;
- d. The client being debarred from dealing in securities by an order of SEBI, other Regulatory Authority or Court;
- e. The client is convicted of fraud or other offence in relation to securities and the said conviction is not stayed by that authority or court or superior thereto.
- f. The account being inactive has not been got reactivated within two years of inactivation.
- g. The client, to the reasonable belief of SMC, has defaulted in payment of its debts to any other financial institution or intermediary,

or admitted its inability or is unable to pay its debts as they become payable.

De-registering of a client will not absolve him from his obligations for transactions at the time of de-registration.

Policy for Inactive Accounts

Inactive accounts are more vulnerable to fraud or manipulation and the clients are advised to be careful not to allow their accounts to be inactive. An inactive account is one in which there is no operation during the last twelve calendar months. Such accounts may be marked as "inactive" in the Back Office without any request by the client. Transaction in an "inactive account" will be permitted after strict diligence.

Payment Gateway

The Payment Gateway facility, when provided, shall depend upon the working of the Payment Gateway owned/controlled by the concerned bank/service provider. The Member shall not be responsible for any delay, defect or discontinuity of service of any Payment Gateway.

Orders & Limits

The Clients' instructions are usually recorded by the Member. Such record shall be admissible as evidence and binding. However, any transaction or instruction shall not be nonbinding merely because no recording is made / maintained / kept / provided.

The Member may subject any order placed by Client to manual review and entry, which may cause delays in processing of the order or may result in rejection of such order.

The Member may reject any order for reasons including, but not limited to, non-availability of funds in the Client's trading account, non-availability of securities in the Client's Demat Account, insufficiency of margin, suspension of trades by the concerned Exchange or application of circuit breaker.

The Member may, in its wisdom, permit execution of orders inspite of insufficiency of margin or in excess of trading limits. The trades, when executed, shall bind the Client and the Client shall provide such sums as may be required, to meet his liability under such trade.

Authority By Client

Any and all instructions issued by an authorized representative of the client shall be binding on the client in accordance with the letter authorizing the said representative to deal on behalf of the client. All authentication of the authority of a client to instruct the Member to deal on behalf of the client shall be determined by the terms in this regard mentioned on the web-site.

Clients' Online Access To Reports

The online clients are provided User ID and Internet Access to see their accounts online. Off-line clients may be given Back Office Access Code to see their accounts and upto-date positions. All offline clients are also provided User ID and password through which they can any time access various back office reports, account information and other useful information. The clients are advised to make full use of the facility and report, discrepancy, if any, in their account at the earliest.

Auto Square Off

The Member has a policy of auto square-off (without separate authority from Client) the Clients' positions in the following circumstances:

- (a) In case of Margin Trades, if the open buy position is neither squared off nor converted to Delivery by Client/s within the stipulated time.
- (b) In case of Margin Trades, if the open sell position is neither squared off nor converted to Delivery by Client/s within the stipulated time.
- (c) In case of Margin Trades, where Mark to Market Loss on the open position has reached the stipulated % of the margins placed with us.
- (d) In all other cases where the margin or security placed by the Client/s falls short of the requirement or where the limits given to the Client/s have been breached or where the Client/s have defaulted on their existing obligation

The actual execution of square off can happen at a price different from the trade bound, due to execution time lag and any loss based on actual execution price shall be borne by the Client. In case the Auto Square off does not take place due to certain reasons like price band, etc. then the Member may convert the open positions to Delivery. If the conversion also fails due to non-availability/ shortage of Demat shares, then for the open sale position, the Client/s will have to face auction or close out as per the rules of the concerned Exchange. Consequently, client/s will be responsible for any resulting losses and all associated costs including penalty levied by the Exchange. If the conversion also fails due to insufficient funds/no funds, then for the open buy position, the shares will not be delivered to the client/s and the Member will liquidate the shares anytime and the Client/s will be liable for any resulting losses and all associated costs incurred by the member.

Cancellation or Modification of orders

Cancellation or modification of an order pursuant to the client's request in that behalf is not guaranteed. The order will be cancelled or modified only if the clients request for cancellation and modification is received and the order is successfully cancelled or modified before it is executed. Market orders are subject to immediate execution wherever possible. The client should not presume an order having been executed, cancelled or modified until a confirmation from the Member is received by the client. However due to technical or other factors the confirmation may not be immediately transmitted to or received by the client and such a delay should not entitle the client to presume that the order has not been executed, cancelled or modified unless and until the Member has so confirmed in writing.

Margins

The Member determines the market value of securities placed / deemed as margin after applying an appropriate hair-cut which may, in

accordance with its risk perception, be higher than that prescribed by the Exchange. Further, the Member fixes from time to time concentration limits on value of individual scrips accepted for margin. Clients should monitor the market value of such securities on a continuous basis and to replenish any shortfall in the value of the margin consequent to a fall in the market value of such securities whether or not the member intimates such shortfall.

The Member shall communicate / advise the method of calculation of margin or the security requirement as rate (s) or perception (s) of dealing and the Client should self monitor their dealings, margin deposits and margin requirements and provide, the required / deficit margin/security as required from time to time, forthwith whether or not any margin call or separate communication to that effect is sent by the Member and/or received by a client. The clients should ascertain the adequacy of margin / security in acceptable form and manner beforehand prior to making any trade / order / deal, to ensure that the margin / security is adequate at all times during an open position and to make up forthwith in acceptable form and manner any deficiency or shortfall therein. If a client's order is executed and/or maintained despite shortfall in margin / security the client shall be responsible for all orders including orders executed without sufficient / non-available margin / security required by the Member / Exchange / SEBI and shall make up the shortfall suo motu at the earliest.

The Member is entitled to consider any sum or money or security lying to the credit of the client as margin received.
