No consideration to trade should be made without thoroughly understanding and reviewing the risks involved in such trading. If you are unsure, you must seek professional advice on the same.

In considering whether to trade or authorize someone to trade for you, you should be aware of or must get acquainted with the following:-

1. BASIC RISKS INVOLVED IN TRADING ON THE STOCK EXCHANGE (EQUITY AND OTHER INSTRUMENTS)

1.1 Risk of Higher Volatility:

Volatility refers to the dynamic changes in price that securities undergo when trading activity continues on the Stock Exchange. Generally, higher the volatility of a security/contract, greater is its price swings. There may be normally greater volatility in thinly traded securities/contracts than in active securities/contracts. As a result of volatility, your order may only be partially executed or not executed at all, or the price at which your order got executed may be substantially different from the last traded price or change substantially thereafter, resulting in notional or real losses.

1.2 Risk of Lower Liquidity:

Liquidity refers to the ability of market participants to buy and/or sell securities /contracts expeditiously at a competitive price and with minimal price difference. Generally, it is assumed that more the numbers of orders available in a market, greater is the liquidity. Liquidity is important because with greater liquidity, it is easier for investors to buy and/or sell securities / contracts swiftly and with minimal price difference, and as a result, investors are more likely to pay or receive a competitive price for securities / contracts purchased or sold. There may be a risk of lower liquidity in some securities / contracts as compared to active securities / contracts. As a result, your order may only be partially executed, or may be executed with relatively greater price difference or may not be executed at all.

1.2.1 Buying/selling without intention of giving and/or taking delivery of a security, as part of a day trading strategy, may also result into losses, because in such a situation, stocks may have to be sold/purchased at a low/high prices, compared to the expected price levels, so as not to have any obligation to deliver/receive a security/have any open position.

1.3 Risk of Wider Spreads:

Spread refers to the difference in best buy price and best sell price. It represents the differential between the price of buying a security/contract and immediately selling it or vice versa. Lower liquidity and higher volatility may result in wider than normal spreads for less liquid or illiquid securities / contracts. This in turn will hamper better price formation.

1.4 Risk-reducing orders:

Most Exchanges have a facility for investors to place "limit orders", "stop loss orders" etc". The placing of such orders (e.g., "stop loss" orders, or "limit" orders) which are intended to limit losses to certain amounts may not be effective many a time

because rapid movement in market conditions may make it impossible to execute such orders.

1.4.1 A "market" order will be executed promptly, subject to availability of orders on opposite side, without regard to price and that, while the customer may receive a prompt execution of a "market" order, the execution may be at available prices of outstanding orders, which satisfy the order quantity, on price time priority. It may be understood that these prices may be significantly different from the last traded price or the best price in that security.

1.4.2 A "limit" order will be executed only at the "limit" price specified for the order or a better price. However, while the customer receives price protection, there is a possibility that the order may not be executed at all.

1.4.3 A stop loss order is generally placed "away" from the current price of a stock / contract, and such order gets activated if and when the stock / contract reaches, or trades through, the stop price. Sell stop orders are entered ordinarily below the current price, and buy stop orders are entered ordinarily above the current price. When the stock reaches the pre-determined price, or trades through such price, the stop loss order converts to a market/limit order and is executed at the limit or better. There is no assurance therefore that the limit order will be executable since a stock / contract might penetrate the pre-determined price, in which case, the risk of such order not getting executed arises, just as with a regular limit order.

1.5 Risk of News Announcements:

Issuers make news announcements that may impact the price of the securities / contracts. These announcements may occur during trading, and when combined with lower liquidity and higher volatility, may suddenly cause an unexpected positive or negative movement in the price of the security / contract.

1.6 Risk of Rumours:

Rumours about companies/currencies at times float in the market through word of mouth, newspapers, websites or news agencies, etc. The investors should be wary of and should desist from acting on rumours.

1.7 System Risk:

High volume trading will frequently occur at the market opening and before market close. Such high volumes may also occur at any point in the day. These may cause delays in order execution or confirmation.

1.7.1 During periods of volatility, on account of market participants continuously modifying their order quantity or prices or placing fresh orders, there may be delays in order execution and its confirmations.

1.7.2 Under certain market conditions, it may be difficult or impossible to liquidate a position in the market at a reasonable price or at all, when there are no outstanding orders either on the buy side or the sell side, or if trading is halted in a security/contract due to any action on account of unusual trading activity or stock/contract hitting circuit filters or for any other reason.

1.8 System/Network Congestion:

Trading on NSE/BSE/MCX-SX is in electronic mode, based on satellite/leased line based communications, combination of technologies and computer systems to place and route orders. Thus, there exists a possibility of communication failure or system problems or slow or delayed response from system or trading halt, or any such other problem/glitch whereby not being able to establish access to the trading system/network, which may be beyond the control of and may result in delay in processing or not processing buy or sell orders either in part or in full. You are cautioned to note that although these problems may be temporary in nature, but when you have outstanding open positions or unexecuted orders, these represent a risk because of your obligations to settle all executed transactions.

2. As far as Futures and Options segment or Currency Derivatives Contract is concerned, please note and get yourself acquainted with the following additional features:-

2.1 Effect of "Leverage" or "Gearing"

The amount of margin is small relative to the value of the derivatives contract so the transactions are 'leveraged' or 'geared'. Derivatives trading, which is conducted with a relatively small amount of margin, provides the possibility of great profit or loss in comparison with the principal investment amount. But transactions in derivatives carry a high degree of risk. You should therefore completely understand the following statements before actually trading in derivatives trading and also trade with caution while taking into account one's circumstances, financial resources, etc. If the prices move against you, you may lose a part of or whole margin equivalent to the principal investment amount in a relatively short period of time. Moreover, the loss may exceed the original margin amount.

A. Futures trading involves daily settlement of all positions. Every day the open positions are marked to market based on the closing level of the index / contract. If the index has moved against you, you will be required to deposit the amount of loss (notional) resulting from such movement. This margin will have to be paid within a stipulated time frame, generally before commencement of trading next day.

B. If you fail to deposit the additional margin by the deadline or if an outstanding debt occurs in your account, the broker/member may liquidate a part of or the whole position or substitute securities. In this case, you will be liable for any losses incurred due to such close-outs.

C. Under certain market conditions, an investor may find it difficult or impossible to execute transactions. For example, this situation can occur due to factors such as illiquidity i.e. when there are insufficient bids or offers or suspension of trading due to price limit or circuit breakers etc.

D. In order to maintain market stability, the following steps may be adopted: changes in the margin rate, increases in the

cash margin rate or others. These new measures may also be applied to the existing open interests. In such conditions, you will be required to put up additional margins or reduce your positions.

- E. You must ask your broker to provide the full details of the derivatives contracts you plan to trade i.e. the contract specifications and the associated obligations.

2.2. Currency specific risks

1. The profit or loss in transactions in foreign currency-denominated contracts, whether they are traded in your own or another jurisdiction, will be affected by fluctuations in currency rates where there is a need to convert from the currency denomination of the contract to another currency.
2. Under certain market conditions, you may find it difficult or impossible to liquidate a position. This can occur, for example when a currency is deregulated or fixed trading bands are widened.
3. Currency prices are highly volatile. Price movements for currencies are influenced by, among other things: changing supply-demand relationships; trade, fiscal, monetary, exchange control programs and policies of governments; foreign political and economic events and policies; changes in national and international interest rates and inflation; currency devaluation; and sentiment of the market place. None of these factors can be controlled by any individual advisor and no assurance can be given that an advisor's advice will result in profitable trades for a participating customer or that a customer will not incur losses from such events.

2.3 Risk of Option holders

1. An option holder runs the risk of losing the entire amount paid for the option in a relatively short period of time. This risk reflects the nature of an option as a wasting asset which becomes worthless when it expires. An option holder who neither sells his option in the secondary market nor exercises it prior to its expiration will necessarily lose his entire investment in the option. If the price of the underlying does not change in the anticipated direction before the option expires to an extent sufficient to cover the cost of the option, the investor may lose all or a significant part of his investment in the option.
2. The Exchange may impose exercise restrictions and have absolute authority to restrict the exercise of options at certain times in specified circumstances.

2.4 Risks of Option Writers

1. If the price movement of the underlying is not in the anticipated direction, the option writer runs the risks of losing substantial amount.
2. The risk of being an option writer may be reduced by the purchase of other options on the same underlying interest and thereby assuming a spread position or by acquiring other types of hedging positions in the options markets or other markets. However, even where the writer has assumed a spread or other hedging position, the risks may still be significant. A spread position is not necessarily less risky than a simple 'long' or 'short' position.
3. Transactions that involve buying and writing multiple options in combination, or buying or writing options in combination with buying or selling short the underlying interests, present additional risks to investors. Combination transactions, such as option spreads, are more complex than buying or writing a single option. And it should be further noted that, as in any area of investing, a complexity not well understood is, in itself, a risk factor. While this is not to suggest that combination strategies should not be considered, it is advisable, as is the case with all investments in options, to consult with someone who is experienced and knowledgeable with respect to the risks and potential rewards of combination transactions under various market circumstances.

Penny Stocks :

Clients may note that all the stocks and securities listed on the Stock Exchange are not actively traded. In other words, there are no readily available sellers or buyers in those securities and/or there are not sufficient trades or volumes from which the market price may be arrived at with some reliability. Such stocks are called 'illiquid securities' or 'Penny stocks'. They are comparatively more vulnerable to market manipulation and / price rigging. The spread, i.e., the difference between the offer price and bid price is usually wide and their purchase or sale at a given time may be difficult and in any case uncertain. Exchanges bring out monthly list of such securities based on the volume during the last calendar month.

We do not encourage trading in penny stocks and trade is not allowed in illiquid securities. In exceptional cases, before allowing a trade in illiquid securities or less liquid securities, we may make further enquiry, in case of instructions for sale, into the nature and duration of holding and in case of purchase instructions, into the client's trading experience, knowledge about the risks in penny stocks, risk appetite and proportion of such stocks to total investment, etc.. This may cause time gap between placing an order and its execution. The Clients will have to bear that risk of delay in execution or our rejection in respect of illiquid securities. Client's instructions for trading in illiquid securities may be rejected without assigning any reason.

Setting up Client's Exposure Limit :

The Exchange may from time to time fix client exposure limits in the interest of orderly working of the markets. Within that overall ceiling, a client can trade within the exposure limit set from time to time by the Broker for the client. Exposure Limit is fixed on the basis of the funds and value after hair cut of the securities provided by the client for margin. Clients are requested to adhere to the exposure limits as crossing the line may involve either a call for margin or restriction on further position/exposure. We may need to vary or reduce or impose new limits urgently on the basis of our risk perception, risk profile of the client and other factors considered relevant including but not limited to limits on account of exchange/ SEBI directions/ limits (such as broker level/ market level limits in security specific / volume specific exposures etc.). Sometimes we may be unable to inform the client of such variation, reduction or imposition in advance. We shall not be held responsible for such variation, reduction or imposition or the client's inability to route any order through our trading system on account of any such variation, reduction or imposition of limits. In the sole discretion of the Company, a client may be allowed to

trade beyond exposure limit or the limit may be increased. A client having availed such indulgence shall not be heard to complain about his trades only on this account and shall meet the margin shortfall at the earliest without waiting for reminder. The golden rule is Limit your exposure so as to limit your risk to your means.

Brokerage Rate :

We do not charge any brokerage in excess of the rate(s) provided by the SEBI / Exchange. The agreed rates of brokerage are part of this book-let and the clients are advised to fully satisfy themselves about the same before signing. The brokerage is charges on both Buy & Sell, except otherwise indicated in the schedule of brokerage. Brokerage rates may be changed from time to time but shall not be increased without prior 15 (fifteen) days' notice. Only Head Office and concerned Zonal Head is competent to reduce the rates of brokerage and no employee or officer at Branches is authorized to do so.

Delay Payment Charges and Penalties :

Clients are required and expected to meet their fund obligations immediately, when due, as per SEBI / Exchange requirements and not make us use our funds to meet their fund obligation. For the clients who do not pay on time your broker has to pay or the client has to suffer penalties by the Exchange. So as to be compensated in such an eventuality, we may levy Delay Payment Charges on the amounts, not exceeding the debit balance in the ledger, for the period of delay. The present rate of Delay payment charge is 18% per annum calculated on daily basis for the period of delay.

We do not pay interest on the clients' funds received towards margin. In exceptional cases, considering the amount of margin, its utilization and the client's past history, we may agree to deduct out of Delay Payment Charges, interest on any part of the unutilized margin at such rate as determined from time to time but not exceeding the rate of Delay Payment Charges.

We may impose reasonable penalties for bouncing of cheques, bad deliveries, non-delivery, auction on failure of payment, non-payment of margin money, excess margin or any trades, actions or omissions contrary to the Rules, Regulations and Byelaws of the SEBI or Exchange, to discourage such violations and recover the same from the Client's Account directly.

Where the Company has to pay or suffer any penalty from any authority as a consequence of / in relation to / in connection with any orders/ instructions/ trades/ deals or actions of a client, the same shall be borne by the client.

Right of Sale of client's securities or closing the client's open position without giving notice:

The online clients are provided User ID and Internet Access to see their accounts online. Off-line clients may be given Back Office Access Code to see their accounts and upto-date positions.

We maintain specific banking and depository accounts, informed to the clients from time to time, for handling clients' funds and securities. The clients shall ensure timely availability of funds/securities in required form and manner, within stipulated time and in the designated bank and depository account(s) for meeting their liabilities and obtaining proper credit thereof. We do not undertake responsibility for any delay or other consequences arising from payment to any other account or non receipt in time and manner in the designated account(s).

We do not believe in selling clients' securities or closing out their positions without sufficient notice to them. On the other hand, we expect our esteemed clients to be regular and punctual in meeting their fund obligations. The requirement of margin and the value of any security given/treated as Margin varies and multiplies with market volatility. For example – if the market goes down by 10%, not only an additional margin would be required equal to this 10%, but further margin would also be required to meet the erosion of value of the securities forming the margin. Higher is the margin deficit, shorter would be the time to make it up. However, in case the available margin falls below the given percentage, say 80%, informed in advance, we reserve the right to sell a client's securities or to close out his all or some open positions to prevent escalation of risk. The client may, however, have no grievance if SMC does not take such action and waits for the client's margin/response.

We would have the discretion to square off the position of Client/s in following circumstances:

- (a) In case of Margin Trades, if the open position is neither squared off nor converted to Delivery by Client/s within the stipulated time or where Mark to Market Loss on the open position has reached the stipulated percentage of the margins placed with us.
- (b) In all other cases where the margin or security placed by the Client falls short of the requirement or where the limits given to the Client have been breached or where the Client has defaulted on his existing obligation within the stipulated time.

Shortages in obligations (arising out of internal netting of trades or otherwise):

Where a client fails to meet his securities pay-in obligations as due

for any settlement and auction is not made by the Exchange because of reasons like internal netting of trades, the client's account is debited for such short delivery at “valuation price or the average of auction rate”, whichever is higher. The buyer client shall be credited with the same amount as debited to seller client. In case, no auction price is available in a particular instance, the above mentioned debit/credit shall take place at closing price on the auction day plus 10% and trading day to auction day high price whichever is higher. If the buyer-client requires delivery of the said shares, he is advised to buy the same next day from the market on his own.

Where a client buys securities in one settlement, and sells the same in a subsequent settlement, without having received the payout of the securities, any resulting auction / losses will be the sole responsibility of the client.

Conditions under which a client may not be allowed to take further position or his existing position may be closed:

Subject to a client's KYC verification and his meeting initial margin and other margin requirements, a client may take positions. However, he may not be allowed to take further position under any of the following circumstances:

- a. SEBI or Exchange imposing restrictions on further exposures in cases of extreme volatility in the market or in a security or group of securities.
- b. client or the Broker exceeding or touching exposure limits set by the Exchange in the particular scrip.
- c. reasonable doubt as to bonafide of the transaction or identity of the client in the light of the financial status and objectives as disclosed in the KYC form.
- d. reasonable doubt as to the transaction being cross trade, circular trade, fraudulent practice or connected with price manipulation or market rigging.
- e. SEBI or other competent authority issuing a debarment order against the client from buying, selling or dealing in securities, unless the order is vacated.

Temporary Suspension or Closing of Account at Client's Request:

The client may, at times, like to suspend his account for some time due to reasons like – illness, holidaying or pilgrimage. SMC account manager may note the instruction to suspend the transactions in an account on receipt of a written request by the client. However, the client will be responsible for all his positions till that time and shall make arrangements for due discharge of his obligations in respect of such transactions.

A suspended account may be made active by another instruction in writing by the client.

The client, subject to his meeting all obligations regarding pending positions, may seek closure of his account by a letter in writing duly signed by him. Such request shall be effective from the time it has been noted in SMC's computer system and the client shall be liable to meet all his obligations.

The request for suspension, re-activation or closure of account should be made by the client and not by his Power of Attorney Holder (POA).

The Company may also withhold any payouts of client or suspend his trading account due to any surveillance action or judicial/regulatory direction.

De-registering a Client:

SMC may de-register a client in any of the following events:

- a. Death of a client who is a natural person;
- b. Liquidation or winding up of a client who is a corporate;
- c. Insolvency or bankruptcy of the client;
- d. The client being debarred from dealing in securities by an order of SEBI, other Regulatory Authority or Court;
- e. The client is convicted of fraud or other offence in relation to securities and the said conviction is not stayed by that authority or court or superior thereto.
- f. The account being inactive has not been got reactivated within two years of inactivation.

Name of Client : _____

Signature of Client : (26) 

Place :

Date :

De-registering of a client will not absolve him from his obligations for transactions at the time of de-registration.

Policy for Inactive Accounts :

Inactive accounts are more vulnerable to fraud or manipulation and the clients are advised to be careful not to allow their accounts to be inactive. An inactive account is one in which there is no operation during the last six calendar months. Such accounts may be marked as "inactive" in the Back Office without any request by the client. No operation shall be permitted in an inactive account except collection of dividend on securities and debiting of charges, if any.

An inactive account may be activated only on written request of the client (Not of a POA). Before activating, SMC may like to re-verify the client's particulars as an abundant caution.

If a request for re-activation is not received within two years of its being noted as "inactive", SMC may deregister it, after informing the client at his last known address by the available means, i.e., telephone, post, e-mail; and return the available balance, if any, to the person(s) entitled to it. In case the client cannot be traced or the persons entitled to the balance cannot be ascertained or they do not come forward, the balance shall be transferred to "dharmada".

I/We have fully understood the above Policies and Procedures and agree to the same as applicable to my client membership relationship with the Member.

(VOLUNTARY)**

I/We confirm that I/We are desirous of regularly dealing in CM and F&O segments of securities on the stock exchange(s). I/We request you to maintain the account, both for securities and funds, with you on a running account basis without settling the account on each settlement of each transaction on my/our behalf. This will facilitate me/us in doing my/our transactions through you. I/we also request you to consider the balances in my/our running funds and securities account for the purpose of margins/any other of my/our obligations due to you. In view of the above, it would be proper for you to retain all amounts payable and all securities receivable be me/us until specifically requested by me/us in writing to be settled or to be dealt with in any other manner. I/We understand and agree that no interest will be payable to me/us on the amounts or securities so retained by you.

I/We agree and empower/authorize you

- a. to act in your discretion of merging balances kept under various accounts held with the you, such as Online Trading Account, Offline Trading Account, NSDL (or CDSL) DP Account, CM Trading Account and F&O Trading Account, MFSS etc., to nullify the debit in any of my/our other account held with you without taking any further instructions from me/us;
- b. to merge the securities kept with you in various accounts in order to nullify the debit in any account of my/our account;
- c. to withhold the credit of securities to my/our demat account if any sum is due from me/us;
- d. to withhold the securities to meet my/our liabilities to you under the trading agreement;
- e. to debit my/our trading account towards depository charges payable by me/us to the designated depository participant and make onward payment to the designated depository participant upon receipt of intimation from the designated depository participant;
- f. to block securities against pending order or pledge securities in your favour against any of my/our dues;

This authorization shall be valid for One Year from the date placed under my/our signature below and may be renewed from time to time by another writing under my/our signature. I/We have the liberty to revoke this authorization at any time.

It is understood that the "Actual settlement of funds and securities" shall be done by you at least once in a calendar quarter. While settling the account you will be sending me/us a 'statement of account', containing an extract from the client ledger for funds and an extract from the register of securities displaying all receipts/deliveries of funds/securities. The statement shall also explain the retention of funds/securities and the details of the pledge, if any. Such periodic settlement of the running account shall not be necessary when (a) I start availing margin trading facility as per SEBI circulars; or (b) The margin provided by me to you is in the form of Bank Guarantee (BG)/Fixed Deposit Receipt (FDRs).

On settlement date you may retain the requisite securities/funds towards any outstanding obligation and may also retain funds expected to be required to meet margin obligation (as estimated by you) for the next 5 trading days, calculated in the manner specified by respective Exchanges.

The statement of Account so issued by you or the settlement made by you shall be taken as correct and shall be binding upon me/us unless a discrepancy or dispute arising from such statement or settlement or receipt/disposal of funds/securities, as the case may be, is brought to your notice with relevant facts/documents within seven working days.

I/We understand that, unless otherwise required to meet my obligations for margin or on settlement you shall transfer the funds/securities lying with you in credit of my/our account within one working day and those lying with the Clearing Member or Clearing Corporation within three working days of my request for transfer.

My/Our preference for actual settlement of funds and securities is at least:
