Chana	Delhi	5097.75	5100.75	-0.06%

Spices

Turmeric NCDEX Apr is likely to trade sideways to down due to subdued domestic demand. Milers are going for hand to mouth buying in anticipation of further fall in prices as arrivals have improved in Telangana, Maharashtra and AP. Stockiest are releasing old stocks at lower rate that will keep prices under pressure. Turmeric Apr contract is likely to trade in range of 6800-7300.

Jeera NCDEX Mar futures expected to trade higher due to emerging festive demand in local market. Export demand has picked up in wake of Ramdan season ahead wherein local festive demand is also improving that will cap the excessive fall in jeera prices from here. However, arrivals of new crop have started in Gujarat and yield prospects have improved in Rajasthan due to favorable weather condition that will put pressure on prices. Jeera export dropped 22% Y-o-Y to 1.78 lakh tonnes in year 2022 due to fall in imports in China. China imported only 37.9 thousand tonnes in year 2022 as compared to 62.8 thousand tonnes of previous year. Jeera prices are likely to trade in range of 29000-31000.

Dhaniya NCDEX Apr prices are likely to trade down on improved supply prospects for upcoming season. Demand has been subdued as major buyers and spices millers are avoiding bulk buying with rising supplies of new arrivals in major mandies. Total production of dhaniya is expected to increase up to 9.5 lakh tonnes in year 2022-23 due to better yield prospects amid higher acreages against the 8 lakh tonnes of previous year. Dhaniya NCDEX Apr Prices are likely to trade in range of 6700-7200.

Other Commodities

Cotton MCX /Kapas NCDEX Apr prices are likely to trade on positive bias due to shrinking supplies at local market. Shrinking arrivals at major trading centers have triggered speculation over the actual production of cotton this season. On contrary of 55%-60% arrivals realization during Oct-Jan, only 30-35% of arrivals have touched the market till Jan in year 2022-23. The Cotton Association of India (CAI), a trade body, has lowered its estimates of cotton crop production further to 321.50 lakh bales (170 kgs) for the current season (October 2022-September 2023) from 330.50 lakh bales projected last month. Despite continuous fall in arrivals, cotton prices have not increased accordingly due to sluggish export demand. Going forward prices are likely to remain under pressure due to demand concerns. Kapas NCDEX April is likely to trade in range of 1600-1640 wherein MCX cotton will rule in range of 62500-64000.

Guar seed Mar are likely to trade down due to sluggish buying in local market. Higher stocks with farmers and bleak demand of gum are likely to put pressure on prices. However, daily arrivals are shrinking, as farmers are not releasing stocks in anticipation of further rise in prices. Guar gum Mar contract is likely to honor the support of 12000 in near term and expected to move towards 13000. Similarly, Guar seed will honor the resistance of 6100 and may find support near 5700.

Mentha oil prices are likely to trade on weaker note due to sluggish buying in local market. Major trend in mentha oil is likely to be bearish due to sluggish demand concerns. Bleak export of mentha oil and increased uses of synthetic menthol is likely to keep prices down. Menthol export from India has dropped 64% Y-o-Y to 0.83 thousand tonnes in Dec'22 with fall in imports from China and Japan. Annual export of menthol is down by 32% Y-o-Y in year 2022 dropped to 14 thousand tonnes. Mentha oil will honor support of 990 wherein 1030 is the resistance.

Castor seed Mar prices are likely to trade down due to improve supplies with advancement of harvesting activities. Sluggish export demand is still a major concern for castor oil traders as domestic stocks are surging up with fall in export. Going forward, castor seed prices are likely to trade in range of 6500-7200.
