Moneywise. Be wise.

## Today's result, its estimates and estimated impact on price movement

Company NSE Symbol	Company Name	Estimates	Estimated Impact
TATASTEEL	Tata Steel Limited	The result is expected to be -ve driven by a decline in revenue in QoQ and YoY on the back of lower volume growth but the domestic business may perform well considering the demand scenario. EBITDA is likely to show muted performance sequentially due to lower coking coal costs at Indian operations which may be partially offset by higher energy costs in Europe.	Negative
MUTHOOTFIN	Muthoot Finance Limited	The result is expected to be +ve on the back of good growth in gold loans. PAT to grow sequentially on better NII growth led by better yields and loan growth. Improvement in Asset quality on a QoQ basis and margins is likely to improve.	Positive
