Chana	Delhi	5053.30	5054.55	-0.02%

Spices

**Turmeric** prices are expected to trade mixed to down due to muted demand at local market. Supplies are expected to improve in Telangana with commencement of new crop. Stockists and traders are going for hand to mouth buying in expectation of further fall in prices. However, losses are likely to be limited due to weaker production as yield dropped due to unfavorable weather condition. Turmeric Apr contract is likely to trade in range of 7100-7700.

**Jeera** NCDEX Mar futures are likely to trade mixed to down due to sluggish buying in local market. Millers and exporters are avoiding bulk buying in wake of new crop season ahead. However, major trend of jeera is likely to remain bullish due to weaker production outlook for upcoming season. Jeera prices are likely to trade in range of 30700-32500.

**Dhaniya** NCDEX Apr prices are likely to trade on weaker note due to lukewarm demand at physical market. Reports of rise in area under dhaniya and better yield prospects supported by normal crop progress will weigh on the market sentiments. Supplies are adequate at major trading centers and will improve further once the arrivals of new crop pick up. Dhaniya NCDEX Apr Prices are likely to trade in range of 7800-8300.

Other Commodities

**Kapas** NCDEX Apr prices are likely to sideways to higher due to forecast of heavy rainfall northern and southern region. Harvesting activities will be disrupted in southern region due to rainfall wherein arrivals pace will also be slowed down. Cotton arrivals are lower as compared to last year as farmers are hoarding their produce in expectation of better price realization. However, sluggish export demands are likely to cap the major upside move. Kapas Apr NCDEX prices are likely to trade in range of 1580-1640.

**Guar** seed Feb futures are likely to remain under pressure due to increased supplies at major trading centers. Arrivals have started improving again after recent gains in prices. However, major trend in guar is likely to remain positive due to robust export demand of gum. India exported about 19 thousand tonnes of guar gum in month of Nov'22 compared to 16.9 thousand tonnes of previous year for corresponding period, higher by 13% Y-o-Y as per the data released by Ministry of commerce, India. Guar seed prices are likely to trade in range of 5600-6100. Similarly, Guar gum prices are likely to trade in range of 11800-12700.

**Castor** seed Feb prices are likely to trade down due to improve supplies with advancement of harvesting activities. Sluggish export demand is still a major concern for castor oil traders as domestic stocks are surging up with fall in export. Castor oil export has slumped 16% Y-o-Y to 543.4 thousand tonnes during Jan-Nov'22 due to economic slowdown in China. Going forward, castor seed prices are likely to trade in range of 6700-7300.

**Mentha** oil Feb contract is likely to trade sideways to higher on improved demand outlook. With improved economic numbers in China, export demand of menthol will also improve that will cap the major downfall in prices. Supplies have been tighter due to offseason period of arrivals. Prices are likely to trade in range of 1000-1040.
