Spices

Turmeric NCDEX Apr is expected to trade mixed to higher on improved festive buying in local market. Buying activities are improving in wake of festive and wedding season ahead. Arrivals have been down in Feb'23 as compared to last year due to lower crop in Telangana and Maharashtra. About 14.6 thousand tonnes of arrivals were reported at major APMC mandies across India so far in Feb'23 as compared to 37.5 thousand tonnes of previous year. Turmeric is likely to trade in range of 6800-7200.

Jeera NCDEX Mar futures are likely to trade in a range unless supply of new crop is picked up. Stocks are tighter with millers as well with stockiest that is forcing them to buy at every dip in the prices. Prices are holding strong support near 29000 and buying is visible when prices come near to this level. Jeera production is expected to be down by 5-8% in year 2023 due to fall in area in Gujarat. Losses in jeera are looking limited due to better demand outlook. Improved festive demand and export enquires will keep the market sentiments up. Jeera prices are likely to trade in range of 30500-33000.

Dhaniya NCDEX Apr prices are likely to trade on positive note as due to short covering. However, gains are likely to be limited due to higher production outlook. Demand has been subdued as major buyers and spices millers are avoiding bulk buying with rising supplies of new arrivals in major mandies. Total production of dhaniya was estimated at 8 lakh tonnes in year 2021-22 and expected to increase up to 9.5 lakh tonnes in year 2022-23 due to better yield prospects amid higher acreages. Dhaniya NCDEX Apr Prices are likely to trade in range of 6700-7200.

Other Commodities

Cotton/Kapas prices are expected to trade sideways to down due to muted industrial buying. Higher production outlook of cotton and heavier stocks with farmers is likely to pull down the prices further. The Committee on Cotton Production and Consumption of the Ministry of Textiles estimates the crop size during the current season at 337.23 lakh bales (170 kg each), which is almost 8% more than the previous season. Consumption by textile mills, including the small-scale units, is likely to be 295 lakh bales in the current cotton season whereas exports are estimated at 35 lakh bales. Kapas Apr NCDEX prices are likely to trade in range of 1570-1630. MCX cotton is likely to trade in range of 62000-64000.

Guar seed Mar are likely to remain under pressure due to muted demand in local market. Higher stocks with farmers and bleak demand of gum are likely to put pressure on prices. Guar seed prices are ruling near to the support of 5600 and prices may drop up to 5400 if prior mentioned level is breached. Similarly, guar gum prices are expected to find support near 11000 with resistance of 12200.

Mentha oil prices are likely to trade higher in fear of fall in area under for upcoming season. Above normal temperature in northern part of Indian will affect the sowing activities adversely. However, sluggish export will cap the major upward move in prices. Menthol export from India has dropped 64% Y-o-Y to 0.83 thousand tonnes in Dec'22 with fall in imports from China and Japan. Annual export of menthol is down by 32% Y-o-Y in year 2022 dropped to 14 thousand tonnes. Mentha oil Mar contract will honor support of 1030 wherein 1080 is the resistance.

Castor seed Mar prices are likely to trade down due to improve supplies with advancement of harvesting activities. Millers are avoiding bulk buying of castor seed in wake of adequate supply at physical market. Sluggish export demand is still a major concern for castor oil traders as domestic stocks are surging up with fall in export. Going forward, castor seed prices are likely to trade in range of 6200-6800.
